

Technical Specification

High Density Conductive Foam. Part Nos: 64015 – 64018

- Semi rigid, conductive foam suitable for protection of individual components via pin insertion
- Material: Polyether based polyurethane impregnated with a carbon loaded rigid latex
- Complies with IEC 61340-5-1
- Density >50kg/m³
- Colour: Black
- Surface Resistance: $1 \times 10^4 \Omega$
- Volume Resistance: $30 \Omega \text{ m}$
- Compression Set: 25%
- Non-corrosive, non-shedding and non-marking
- Supplied in sheets, rolls or cut pieces
